

REMARKS

The amendment requested to the Specification in the present application is to correct an oversight in the drafting. The invention which is the subject of the present application was determined to have been developed pursuant to a contract with the United States Department of Energy. Existence of the contract was not known to the inventor at the time the application was drafted. No deception was intended by the failure to cite the contract at the time the application was filed.

Respectfully submitted,

Date: 3/17/2004
